

What do you wish
your software could do?

(How about: Make work life easier for your caregivers – and you?)

ALORA
Home Health Software

When running your agency becomes simpler, there's no limit to what you can accomplish.

It's true: Simple is power.

And that's just what Alora Home Health Software gives you – a platform that makes it much easier to manage every aspect of home health care.

It's 100% mobile. Your caregivers can accomplish any task on their cell phones. Everything's stored in the cloud.

It's really easy to use. All software companies claim this – but when you see Alora's interface, you'll know that no other solution is simpler to learn or navigate.

It's powerful. Ability to process any payer, including Medicaid in every state. Documentation for all disciplines (nursing, therapy, etc.) Visit monitoring and EW. Flexible scheduling. HR and payroll. We could go on...

Need something customized for your agency workflow? We're developers, too. (Let's talk...)

5 ways Alora makes it easier for your agency to perform better

Tools to improve caregiving. They're easy for your front-line team to learn and use – and they work on all kinds of devices.

The ability to process and bill multiple payers. That includes Medicaid in any state as well as Medicare, insurance, and private pay.

Added efficiency (and profitability). Eliminate manual entry of paper records and centralize your workflow.

Greater flexibility. We'll train your staff to meet your agency's business model. And our licensing agreement will reflect your agency's unique needs and users.

Rapid, real-person support. If you call for help, a professional with years of experience will answer – not a voice menu system.

ALORA WHO?

The word means “better than best.”

And in 2005, that's what we set out to create.

So many home health software providers are divisions of larger companies. The more comprehensive their solutions, the more complicated they can be to learn and manage.

Alora was founded on the concept of simplicity: When software is both robust and easy to use, more can be accomplished. And agencies grow.

A SOFTWARE DEMO CREATED AROUND YOU

While Alora software does just about everything, we'll tailor our demonstration to be efficient and relevant to your agency's needs. • Sales@AloraHealth.com • 800.954.8250

The screenshot shows two sections for electronic signatures. The top section is titled "Patient Signature" and includes a green "Add Signature" button, a handwritten signature, a "Signed Date" field showing "01/14/2017 01:04 AM", and a "See GPS Coordinates" link. The bottom section is titled "Nurse Signature" and includes a green "Add Signature" button, a handwritten signature, a "Signed Date" field showing "01/14/2017 01:04 AM", and a row of buttons: "Previous Tab", "Save & Print", "Save & Close", and "Cancel".

The screenshot shows a "Wound Care" interface with a blue header and a yellow "Add Wound" button. Below the header are four columns, each representing a wound (Wound 1 through Wound 4). Each column contains a human figure with a red dot indicating the wound location, a green "Location" button, and a form with fields for "Type of Wound", "Location", "Length/Width/Depth (cm)", "Drainage Amount/Type", and "Tunneling/Tunneling Location".

Two views of Alora simplicity: Caregivers can obtain electronic signatures or pinpoint wound care — on any device

Which of these would benefit *your* agency?*

- Full mobile access, with cloud storage
- Electronic claim processing for Medicare, Medicaid (all states) and insurance
- Electronic visit verification / live monitoring (via GPS or telephony)
- OASIS & comprehensive assessment
- Accommodation for both skilled and non-skilled home care
- Evaluation, plan of care & notes for all disciplines
- Medication profiles, with interactions and info for patients (powered by Medi-Span)
- Electronic signature capture (for patient and caregiver)
- Complete physician interaction (POC, orders, F2F – electronic faxing and physician portal)
- Secure, HIPAA-compliant email, with text alerts that email is waiting
- Accounts receivable and financial reporting
- Nursing review of field staff activity for quality assurance
- HR functions and payroll
- Robust scheduling with calendar view, batch entry, and agency-level global view
- Offline documentation
- Communication logs for patients and caregivers
- Referral tracking
- Alerts for frequency, prior authorization, scheduling conflicts
- Dashboard and analytics
- Multi-site office management (within one system!)

Alora's interface is designed for easy access and use on your caregiver's mobile device.

**Alora offers all of the above – and a lot more – to help your agency perform better.*

SEE FOR YOURSELF

Simplicity and power must be seen to be believed.
